B. Read about the Akashi Suspension Bridge

The Akashi Kaikyo Suspension Bridge, Japan (completed 1998)

The Akashi Kaikyo Suspension Bridge connects the city of Kobe in Japan and Awaji-Shima Island. It's a bridge with three world records. It's the world's:

- * longest suspension bridge
- * highest suspension bridge
- * most expensive bridge

Facts about the bridge:

Total length 3991 metres
Longest span 1991 metres
Height of towers 297 metres
Length of cables 300,000 kilometres
Cost US \$ 4.3 billion
Material steel
Total weight of steel 193,200 tons
Engineers *Honshu Shikoku Bridge Authority*

Read the sentences. Some numbers are not correct. Correct them!

1. The longest span is one thousand nine hundred and eighty-one metres.

2. The cost of the bridge was four point five million US dollars.

3. The total length of the bridge is three thousand nine hundred and ninety-two metres.

4. The bridge is made of steel and the total weight of the steel is a hundred and ninety-three million four hundred thousand tons.

5. The cables are three hundred thousand kilometres long.

6. The towers are two hundred and sixty-nine metres high.

Vocabulary Box:

suspension bridge – Hängebrücke
